Chest X-ray report

PATIENT	pat7	PATIENT ID	PAT-000043
STUDY DATE	2026-09-22	STATUS	AI Draft

EXAMINATION

Chest X-ray

CLINICAL HISTORY

No clinical history provided

TECHNIQUE

Posteroanterior (PA) chest X-ray

FINDINGS

The radiograph shows bilateral lung opacities, more prominent in the lower zones. The cardiac silhouette is normal in size. No pleural effusion or pneumothorax is seen. The osseous structures are intact.

IMPRESSION

The chest X-ray shows bilateral lung opacities, likely representing lung opacity.

RECOMMENDATION

Further evaluation is recommended to determine the cause of the lung opacities.

DISCLAIMER

This report was generated by an AI assistant from retrieved similar cases and requires review and approval by a qualified radiologist. The most similar retrieved case scored 0.94 against a minimum retrieval-support threshold of 0.89, and 60% of the retrieved cases agree on the leading finding.

VALIDATION

- Mentions 'Normal' which is not supported by retrieved evidence
- Mentions 'Pleural Effusion' which is not supported by retrieved evidence
- Mentions 'Pneumothorax' which is not supported by retrieved evidence

CONSISTENCY

Partially checked — Ran: temporal, contradiction. Not run: transplant.

autonomous diagnosis.
